

## **Testimonials - PROFIBUS Commissioning Course**

The course was extremely informing and will be invaluable to myself and KMI in ensuring the Profibus networks that are being installed on this and all future projects work correctly. I have never attended a training course that has been as informative and beneficial. The presentation was pitched at exactly the correct level to ensure full and proper understanding of each subject.

Regards,

Robbie

## **Customer Comments from MMU's PROFIBUS Maintenance Course first presented at Masterfoods, Slough March 2005**

Good quality, concise information covering a complex subject matter

Very Good

Course notes are excellent for future reference and as representation of the course itself.

Very Good. We now have to put this into practice and relate it to our equipment.

A very informative course for those new to the PROFIBUS systems.
