MMU's PROFINET Workshop – Presented by Andy Verwer

Here are some of the comments received back on the Anonymous questionnaires completed by all delegates at the first ever Workshop presented January 2007:

- Excellent as usual! Andy is an asset to MMU!
- Difficult to fault anything. I feel it was well balanced, well delivered, covered the material I wanted. Well done – truly!
- Very interesting course. It was good to discuss ideas with other people.
- It gave a good overview and was helpful as I didn't have much knowledge of Ethernet or PROFINET.
- Very good (as usual)!
- A reasonable "taster" for PROFINET and PROFINET IO in particular.
- Overall, as an introduction to PROFINET this was a useful and enjoyable course.
