New topics at the conference will also include robotics (SRCI - Standard Robot Command Interface), PROFINET over APL, Single Pair Ethernet (SPE), Module Type Package (MTP) and NAMUR Open Architecture (NOA). We explain what interoperability means and how we ensure that all systems work together smoothly. Find out more about cross-sectional technologies for functional safety in the area of security and safety, both for personal and property protection and for IT security. We will show you how end-to-end digitalization works from the field level to the cloud.
